## The Fundamentals of Waldorf Preschool

June 26-28, 2017

with Stephanie Skinner

Teachers, caregivers, and parents will gain many insights from this introductory course that covers healthy approaches to nurturing 3- and 4-year-olds who need to move and do! We will explore Steiner's philosophy of child development and current research on the young child's developmental needs in the context of the Waldorf educational approach. Hands-on sessions will focus on creating a joyful circle time, puppetry, storytelling, movement, music, and nursery rhymes.

Participants will build on activities appropriate to the preschool child, develop an understanding of preschool child development, and practice music and movement for preschool students.
